GUIDE AND BROWNIE DINNER

On Wednesday, June 8th, a dinner was held in the Scout Hall for the Guides and Brownies, their leaders and their mothers. Guest speakers for the occasion were Mrs. G. Newman, Divisional Commissioner of the Provincial Guides and Brownies, and Mrs. Eric Nicholls, Divisional Commissioner; both Mrs. Newman and Mrs. Nicholls are from Jasper Place.

Guide leaders are Mrs. M. Whigham and Mrs. A. Robinson. Brownie Leaders are Mrs. Kathy Bright and Mrs. Margaret McLean. Mrs. Irene Campbell is acting President and Sheila Campbell is Senior Guide and Packie for the Brownies. Mrs. Margaret McLean is Executive secretary. Mrs. M. Palmer and Mrs. M. Lockie are in charge of Brownies testing. Mrs. Ruth Anderson is Guide and Brownies Badge secretary. Past president is Mrs. Lyla McLean, who has worked very hard at organizational work.

Other guests included Rev. and Mrs. Russell Brown, of All Saints Anglican Church which is the sponsoring body for the Brownies. Mrs. W. Davis of the Anglican W.A. and Mrs. Trudel and Mrs.

Dion, for the C.W.I., the sponsoring body for the Guides.

Toasts for the evening was Mrs. Joan Gray, who turned in a very creditable performance in that capacity. Brownie Lorraine Kasrtnaker asked the blessing before the meal. Following the meal, which was served by the C.W.I. Valli Urchysyn gave the "Toast to the Queen". Judy Zucht then read a poem she had written entitled "Tender-Powell". This fine little poem was published in "Woodsmoke" magazine, the Girl Guide and Brownie magazine. Introduction of the guests was made by Toastmistress Gray, with the Toast to the Guides and Brownies then given by Mrs. Wollen, and the reply to the Toast was made by Brownie Debbie Thode. Toast to the mothers was given by Sylvia Dion with the reply given by Mrs. Nancy Lerballester.

Brownie Report was given by Brownie Leader Kathy Bright and the Guide Report was given by Guide Captain Molly Whigham. Following these ceremonies Commissioners Mrs. Newman and Mrs. Nicholls spoke a few well-chosen words.

CAFE TO RE-OPEN

The former Pembina Gardens Restaurant will soon be re-opened under a new name, new management and a fine new arrangement.

The restaurant will be known as the Club Cafe and will be operated by Hong Mah and Dick Wong, who were formerly employees of the Drayton Valley Hotel Cafe.

The new restaurant will feature something that it badly needed in Drayton Valley, banquet room which will handle either small or large affairs. The large building has been divided down the centre and the west side will be divided into three banquet rooms, separated by folding doors. Each room will have its individual entrance, so that these banquets or parties could be in progress at the same time. If necessary, for larger affairs the folding doors can be put back and the whole rooms made into one large banquet room which would seat about 150 persons.

Photo by Cun's Studio

Many Mothers have cause to be grateful to Mobil Oil of Canada for the presentation made by the Company in June last year of this Infant Resuscitator to the Hospital. The machine is used at every birth and is invaluable when a Caesarian operation is performed, also when an infant's life is in the balance.

When the Hospital Board found it very difficult to allocate money for this purpose \$1,000.00 (approx) Mobil Oil responded in a matter of hours when the need was put before them by one of the Doctors. The picture shows Nurse Marinka

holding a recent arrival, Baby Manchester.

Drayton Valley Municipal Hospital for its size, holds top place for births per year and is the first small Hospital in the Province to be equipped with this ultra modern machine.

The plaque reads:

June, 1959:

This Infant Resuscitator was presented to The Drayton Valley Municipal Hospital by Mobil Oil of Canada Ltd., coincident with the sixth anniversary of the discovery of the Pembina Oil field June 1951.

W.I. Presents Wheel Chair

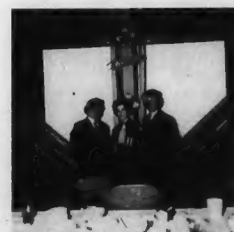

Staff Photo

Women's Institute members, left to right are Mrs. Oscar, Mrs. Chilchase, Mrs. Nordby, Mrs. Deby, Mrs. Frank, and Mrs. Wilson. The two wheel chairs were the result of the work of the W.I. which sponsored a Magazine Sale Drive and used the proceeds to purchase two wheel chairs for use in the community. These will be made available to any person in the district who is in need of a wheel chair. The chairs are at the Hospital and anyone in need of them may contact the hospital.

The Women's Institute was first organized in Drayton Valley in November, 1954. Mrs. Roy Burrows was the first president. Present president is Mrs. Deby, vice-president is Mrs. Hittinger, treasurer is Mrs. Nordby and the secretary is Mrs. Jack Frank. The Drayton Valley branch of the W.I. is said to have a greater turnover of members than any branch in the province.

The ladies of the W.I. have undertaken many other projects for the community and the wheel chairs will be of great value to residents of this district from time to time.

BROWNIE & GUIDE COMMISSIONERS

The picture shows Mrs. Newman, Commissioner for Provincial Girl Guides, Sheila Campbell, Senior Guide, and Mrs. Nicholls, Provincial Guide Commissioner.

Sheila is wearing her All Around Cord which had been presented to her about a week before the Guide and Brownie Dinner. The All Around Cord is the second highest award in Guides. It is obtained after a certain number of badges have been awarded. Highest award in Guides is the Gold Cord.

Among the rest of microrems in Magistrate Cieslowski's court last Tuesday was a young lad who was fined \$25.00 for speeding. Apparently the lad, in a big rush to go to no place in a hurry, saw Chief Al Miles standing on the corner and slowed down till he got away from where the chief was. Then he speeded up again just in time for Constable Peter Loberg to catch him on the corner. Crime just doesn't pay!

Box Carpenter visited with Mrs. Carpenter and the children who are still in Drayton Valley, recent ly. Rex is now stationed at Spirit River in the vendee there. The family will move there as soon as school is out.

Shades of '54 (1954) were awakened recently when Mr. and Mrs. Ed. Rempel returned to D. V. from Red Deer. The Rempels were here at the beginning of the "boom". Mr. Rempel Sr. was in the contracting business and built several of the homes in Drayton Valley and out in the field. Ed. is now working for Film Btg.

One more week will Mr. A. Reid of the Royal Bank be in Drayton Valley. He is taking over as manager for Jim Connolly who is on vacation.

Jim is whiling away his time in Jasper, Banff, and Calgary, with perhaps a side-trip to former hometown, Regina.

Seat-mate of ours on the recent return trip from Toronto was Dickie Duff, of the Toronto Leafs. Dickie is now 24; he has played with the Leafs for five years and expects at least five more years playing with them.

Every July he takes a University course. He is spending his time till July 1st, fishing and golfing. As we came into Saskatoon for a landing he was craning his neck looking for golf courses.

New patrolmen in Drayton Valley Police Force are Constable Peter Loberg, of Grande Prairie and Joe Dixon, of Lac La Poudre.

Condensates contain, in natural form, motor gasoline, diesel fuel, and some "heavy" hydrocarbons. "Condensates" must be refined, however, to separate these products. In fact, condensates could be called a very high gravity crude oil, and that is frequently what they are called if they are any other color except "water white". These condensates are products that over-lap production from gas wells and production from crude oil wells.

James A. Seaton, President of Pembina Pipe Line Ltd., whose Company is continuing a two-year study of natural gas by-products, expressed a fear that the

majority of Albertans were "totally unaware" of the nature, quantity, or use of the liquid hydrocarbons which were produced with natural gas from all wet gas fields.

"Most Albertans believe that propane and butane are the major by-products produced from wet gas fields," Mr. Seaton said. "This is far so. Condensates are by far the largest single by-product, and will soon account for over two-thirds of all liquid hydrocarbons produced. Most people know about propane as a fuel, and some are aware of butane as an ingredient for making synthetic rubber. But none of us know, even the industry experts, that Alberta would be producing in the very first year of additional gas export, over six times more liquid hydrocarbons than we are producing today, and that approximately 70% of the hydrocarbons would be in the form of condensates."

Mr. Seaton went on to explain what was generally meant by the L.P.G.'s or liquefied petroleum gases. Methane and ethane, under normal conditions of pressure and temperature are gases, and make up what we call "natural gas". Ethane is one of the most wanted chemical feedstocks, and it, in fact, used exclusively by one of Alberta's present chemical industries. Practically all of the natural gas which will be required to meet the new demands of Trans-Canada Pipe Line Ltd. and Westcoast Transmission Co. Ltd. will come from "wet" gas fields in the foothills areas of Alberta. "Wet" gas fields are so called because in addition to the methane and ethane of natural gas, the product from the well also contains propane, butanes, (the so-called L.P.G.'s), and condensates.

Propane and butane, while gases under normal conditions of temperature and pressure, are readily converted to liquids when kept under pressure, and are the first two of the group usually called "liquid hydrocarbons". Condensates are sometimes called "distillate" or "natural gasoline". Actually, condensates are all of the remaining liquids from the wet gas field after the propane and butanes have been accounted for. Condensates contain, in natural form, motor gasoline, diesel fuel, and some "heavy" hydrocarbons.

Home DESTROYED BY FIRE

FIRE in MAY

10 miles from Drayton Valley cause unknown, estimated damage \$1,000.00.

No. 25 May 8: Vince Kowat, diesel stove, estimated damage \$150.00.

No. 26 May 10: Most likely smoke house. Estimated damage \$100.00.

No. 27 May 24: Nick's Trucking

Photo by Curt's Studio

Fire completely destroyed the home of the Allen Raudebaugh family about half way between Violet Grove and Drayton Valley last Friday evening. The house and all contents was completely destroyed, with no insurance to cover the loss.

Badly burned was Mrs. Raudebaugh and the 4 1/2 months old baby. They were rushed into Drayton Valley hospital and later removed to a hospital in Edmonton. The baby is said to be making a satisfactory recovery, but Mrs. Raudebaugh was more seriously burned.

Apparently the son, Joe, was attempting to light the fuel stove when it exploded, scattering flaming fuel about the house. Members of the Drayton Valley Fire Department, with two tankers filled with water, went to the scene of the fire and preventing it from spreading to a nearby farm.

LIFE: WHAT IS IT?

By Joe Huchuk.

The following article was reprinted from the Blue and Gold Dart, the Drayton Valley High School paper.

My philosophy of life is that every single person on this earth is here for the same reason, but I believe that reason lies with the Creator of this universe of ours. Mathematically, it has been proven quite conclusively that life can be no accident, and that it must have been created by the same Being who is our Creator. How could any accident produce such a vast array of creatures and plants, synchronizing the numbers of each so perfectly, that, if there were no interference life could go on almost indefinitely, for millions of years.

Mankind is the most highly developed organism on this Earth, and virtually all races have worshipped God in some form or another. Most of these races have also believed in life after death, even when separated by thousands of miles of distance, and oblivious of each other's existence.

Can our minds, our thoughts, our ideals and ideologies, our inspirations and fears completely dissolve when our bodies expire, and go back to the dust from which it came? Or do they go to Heaven, as our Christian religion states, and take part in a perfect "life", but not as we know it?

Down through the ages from the vague, mist-hidden past to the present, hundreds of religions have attempted to explain life, and the best definition, I believe is that "life is the existence of someone or something plus its ability to perpetuate, or attempt to perpetuate the species, and this object of life contains all the incidents which this individual has ever encountered, or which has been directly or indirectly influenced by."

Now, I ask is all life on this world meant only for our ease and enjoyment? Is it meant for us to dominate, to bow to our will, or is it part of an infinite Plan on the part of the Creator?

Yes, it must be part of this Plan, but so far the answer lies only in Him who first established this Plan.

D.V. Hospital Women's Auxiliary

The May meeting of the Drayton Valley Hospital Auxiliary was well attended. Plans were made to collect or make items for layettes to be displayed and sold from the new cabinet built by the McClelland Construction Co. with materials donated by Mr. Zollmer from Imperial Lumber. Our thanks to these people. Anyone wishing to donate items to these layettes may contact Mrs. Palmer at Phone 576.

Plans were made to convalesce for the T.B. Clinic. The following people volunteered. Mrs. Waugh Mrs. Zucht, Mrs. Wiggley, Mrs. Gano, Mrs. Machan, Mrs. De Gist, Mrs. Hart, Mrs. Harrison. It was planned to approach the restaurants to ask if they would donate Coffee Break money morning or afternoon one day each. The Auxiliary has purchased a stainless steel table for the Delivery Room.

Mrs. Johnnie reported there was a great need for a second Oxygen tent for the Children's Ward. This was discussed.

Mrs. Palmer reported on the progress of the serving for the Hospital. To date 11 men's pyjamas.

Mrs. Joan Grey said the would continue to make and send out.

20 nursery gowns, 10 nursery blankets, 8 nightgowns 3 ym. old, 9 small pyjamas for children, 4 adult dressing gowns, 7 pr. children's slippers. 15 sick baby gowns have been made by our group of sewers.

A final sewing bus for this year will be held Wednesday night June 15 at 8 p.m. in the basement of the Hospital. Anyone interested please call Mrs. Palmer, Phone 576.

The next regular meeting will be held Monday June 20 at 8:30 p.m. in the Nurse's Restroom. Once more we invite anyone interested to attend.

Home & School Meeting

The final meeting for this season was held with a good attendance. The Grades 3 & 4 rooms were open with teachers in attendance for parents to visit.

Election of Officers was held. The following Officers were elected for the next season:

President, Mr. Bud Byrnes; Vice-President, Mrs. Miller (Salary Box); 2nd Vice-President, Mrs. Bertram Palmer; Secretary, Mrs. E. Holder volunteered to take this position; Treasurer, Mr. Frank Perry; Program Chairman, Rev. Wilf; Publicity Convener, Mrs. Robert Simon; Membership Convener, Mrs. Olga Palmer; Coffee Chairman, Mrs. Deane; Scholarship Committee is as follows: Representing the School-Mr. John Grey; Representing the Church-Rev. A. Wright; Representing the Business-Mr. Clapp.

Mr. Holder said as Past President and a member of the Executive he would help in any way he could.

Mrs. Joan Grey said the would continue to make and send out.

notice for the meetings. Our thanks to her for a good job done. Mr. Grey asked for help on Sports Day which will be held on June 24. 1 to 3:30 p.m. for the Grades 1-6 pupils.

Mrs. Nelson also asked for volunteers to help with the Canaan that day.

The amount of \$40.00 was voted to buy permanent prizes for the Sports Day such as shields, bibbons etc.

The following volunteered to help in the Home & School Meeting. Mrs. Nelson, Mrs. Holder, Mrs. Cobette, Mrs. Turner, Mrs. Grey, Mrs. Fink, Mrs. Miller.

On Farmer's Day Mr. and Mrs. John Grey with the help of some Grade-VI boys, who gave up their holiday, leveled and worked the lawn in front of the school, and with 4 volunteers at night finished the job. Our thanks to these people who worked so hard.

Mr. Grey stated the children have co-operated 100% in not stepping on the lawn area.

The program was greatly enjoyed by all. Mrs. Wm. Hacks, who with her husband Rev. Wm. Hacks are Missionaries in N.

THE BIG DECISION

continued from a previous issue.

I seriously doubt that many of us know how far Canada has come in making himself independent of "outside the country" manufacture of things we use and consume. While I am aware of and recognize the need for trade by Canada with other countries and hence the need to import foreign-made products, reciprocally, I am sure that a week long effort of "Being Canadian" and "Being Canadian", coupled with good sound advertising and publicity to ourselves would be extremely revealing. It might also provide a sound basis for future overall planning.

the Snapshot Guild

An A filter brought out the clouds in all their billowy whiteness in this shot.

The ABC's of Filter Facts

A number of our readers have asked us to tell them something about filters. In the main, their questions are concerned with when to use them and what kind to choose.

Though there are a great many different filters, we'd like to describe the three that you probably find most useful to you in your black-and-white snapshotting this summer. These are a red or A filter, a medium yellow or G filter, and a deep yellow or G2 filter.

If you're looking for dramatic dark-key effects with sharply contrasted clouds, try slipping a red filter over your camera lens. It's amazing what that little piece of dyed gelatine can do in turning

an average shot into something quite spectacular. A medium yellow or K2 filter will cut any haze there might be at sunset time. But for a truly brilliant scene, the deep yellow G filter is in order. It's that G filter again for landscapes where distant details are important, and sand under sunlit blue skies. You'll find that marine or water scenes can also be much more effective when filters go to work on the job. To show up the shimmer and sparkles in water, a medium yellow (K2) filter is a good choice—but if you prefer your print to have the water more dramatically darkened, a deep yellow (G) filter is the one to do the trick for you.

—John Van Outlander

provided only four per cent of the \$2.9 billion petroleum industry income over the past dozen years.

The four permits, which are for export of 6.5 trillion cubic feet of gas over the next quarter century will, by 1963, be contributing approximately \$75 million a year towards a more favorable balance of trade for Canada, the B-A president said.

He pointed out that Canada was four times as dependent upon foreign trade as the U.S., and last year had a \$823 million trade deficit with the U.S.

"Not only will gas export ameliorate the trade situation somewhat, but the ancillary construction projects will help increase employment and contribute additional buoyancy to the economy," Mr. Loughney said.

Approximately \$1 billion would be invested over the next six years for transmission and processing facilities, including about 20 new plants, he said.

Mr. Loughney noted that Canadian oil industry growth since 1947 has required a tremendous \$6 1/2 billion capital outlay which has been possible without investment from the U.S., on a very large scale. He said it has been estimated that Canadian industry as a whole is 51 per cent owned by Americans, 41 per cent by Canadians and eight per cent by others.

"Canadians are not too concerned about this situation so long as they are able to participate in the prosperity that oil investment brings," the B-A president said. "Canadians look forward to continued and increased investment from the U.S. and other countries, but they do not wish to have their economic, any more than their political affairs, determined outside Canada."

PETROLEUM INDUSTRY GETS LIFT

Canadian petroleum industry production revenues should more than double the 1959 figure by 1967, reaching \$1 billion in that year with an estimated \$775 million from crude oil and \$542 million from natural gas, British American Oil president E.D. Loughney said.

Addressing the Petroleum Accountants' Society of Oklahoma, Mr. Loughney said the Canadian petroleum industry "came of age" with the Canadian Government's recent approval of four gas export permits.

The said export of gas to the U.S. would help correct the serious imbalance in the Canadian industry where "despite the many millions of dollars spent developing natural gas reserves, gas has

DOCTOR JOINS MEDICAL CENTRE

Dr. Vernon Magnus has recently joined the staff of the Medical Centre. He is a graduate of the University of Alberta.

Dr. Magnus has just completed one year leave at the City Hospital, Saskatoon; his home is at Luedland, Saskatchewan. He attended High School there and studied at the University of Alberta from 1953 till 1959.

The addition of Dr. Magnus to the Medical Centre staff brings the first Canadian doctor into Drayton Valley to practice medicine.

WHEN WAS CANADA'S FIRST HOUSE BUILT?

In 1600 at Tadoussac, a village on the north shore of the St. Lawrence at the mouth of the Saguenay River. Henri Pierre Charvillat, with a group of prospective colonists, built the first house in what was to become Canada. In 1699 Charvillat had obtained a ten-year monopoly of the fur trade on condition that he build a habitation and establish colonists in New France. He chose the site at the mouth of the Saguenay which had been visited by Jacques Cartier in 1535. In 1615 Jean Dolbeur, a Recollet priest, undertook at Tadoussac the first mission to the Indians. In 1641 this mission work was taken over by the Jesuits who in 1646 built here Canada's first stone church. In 1747 this church was replaced by a wooden chapel that still stands. The village owes much of its modern development to the tourist traffic, which began as long ago as 1850.

The condemned man was led before the firing squad. He was asked if he had any last requests. "Just one," he replied, use blanks."

PETROLEUM INDUSTRY GETS LIFT (cont.)

"This is not anti-Americanism," he said. "It is simply pro-Canadianism."

Mr. Loughney said there has been an apparent lack of sufficient communication between the U.S. and Canada as defense partners, and noted that the same difficulty has arisen over the proposed atomic blast in the Athabasca tar sands.

The B-A president said Canadians also have been irritated by the extent to which labor organizations in Canada have threatened their parent bodies in the U.S.

Because Canada and the U.S. are so similar, he said there was a tendency in the U.S. to forget that Canada is a foreign country. From an oilman's point of view, he said there are differences in regulations governing such things as income taxes and depletion allowances which make it just as hard as in the U.S. -- if not harder -- to earn a dollar in the petroleum industry in Canada.

CALGARY POWER LTD.
Serving the province of ALBERTA

REPORT FROM PARLIAMENT HILL

By Hugh M. Homer, M.D., M.P.,
Jasper-Edson,
House of Commons
Canada

After much negotiation we have received notice from the Hon. A. J. Brooks that the problem of further credit assistance to veterans on provincial land is settled.

The essence of the arrangement is that, providing the Province

agrees to issue title to the veteran and after investigation, be prepared to approve a loan under its legislation. The intention is to have the grants made under Sec. 38 of the V.L.A., secured by a second mortgage which will be registered after the Farm

Credit Mortgage. This second mortgage would be self-liquidating and discharged after the end of the ten-year period required to earn the grant available under the Veterans Land Act.

This means that after 8 years on a Veterans Homestead lease, the veteran will be able to get further credit assistance to develop his farm. This is something that could not be done before, and the only way the veteran could take advantage of further V.L.A. was to repay the \$2,350. grant. This will not be necessary now. Any veteran on provincial land should see his nearest V.L.A. credit advisor in this regard.

POTENTIAL GAS BY-PRODUCTS

Cont. from page 2, col. 5.

"It was quite natural", Mr. Scott said, "for Albertans to get the impression that liquid hydrocarbons are all unavailable as raw material for the chemical industry. The near magic of some chemical transformations have been widely and glamorously reported in many consumer magazines. The same kind of articles were written about coal years ago, but the hard facts of Alberta's geography and relatively small population have combined to prevent any coal industry from developing to any extent in Alberta. It is not generally known, but only 27.6 per cent of all propane and butane produced in the United States is used as chemical raw material. 72.4 per cent of these products are disposed of by refraction, and by using them directly as fuel. Propane, which many Albertans are familiar, is a good heating fuel, and is also used with special carburetors for engine fuel. Propane, when it meets competitive conditions, is also a good chemical raw material. However, even with Alberta's present propane production some propane is exported in the winter for relatively near fuel markets, and some is burned off in summer when the fuel market sharply declines. There is even now a surplus quantity of propane above their requirements and the requirements of Alberta's existing chemical industries. With a production soon to be four times as great, there will be ample propane to meet all of these expanding requirements and still leave a substantial surplus. Butane is not as suitable for heating purposes as propane, since it liquefies in cold weather, but it is also a good chemical feedstock, particularly for synthetic rubber. Mr. Scott emphasized that a pipe line gathering system of the liquid hydrocarbons would make all of the products more readily available throughout the Province, both for heating use, fuel use, and as potential chemical raw materials. The condensates, used as refinery feedstock to produce motor gasoline and diesel fuel, would make up the great bulk of product in such a gathering system and would also be available throughout the Province. It is interesting to note, however, that every barrel of condensate used in a refinery replaces more than a barrel of normal crude oil. "We have some valuable commodities in our natural gas by-products", Mr. Scott concluded, "but it is absolutely impossible to imagine that we can use them all within our own Province, or even within Canada, even granting the highest rate of chemical industry expansion anywhere in the world. Meanwhile, chemical manufacturers are finding other ways of obtaining the basic chemical raw materials of air, water, salt, carbon and sulphur. With production now to be eight times the present rate, the problem of the best utilization of our propane, butanes and condensates becomes acute."

GUN CLUB NEWS

By: Ellis Indoor Shoot Reporter.

The Ellis Indoor Rifle Range has proven itself beyond doubt as being a popular Monday night gathering place for both young and old.

To date four shoots have been held, starting with an attendance of eleven juvenile and six adult shooters. Last Monday night there were thirty-two adult and eight adults on hand.

Shooters now range in age from eight years (they must have their parents consent) up to one who is a few years their elder, possibly in his early 70's. We don't want to expose anyone but he is a well known personality employed by Filer Rig Co., we believe, and we are pleased to have a man of his experience in the use of firearms with us.

President Earl Thompson, of the D.V. "Elli" Gun Club says that several of the young shooters who attended the first shooting practice have progressed so rapidly that they will be separated from the beginners at an early date and given more actual shooting practice.

Close to 100% of our shooters are being registered with "Dominion Marksmen", which will allow us to compete with other clubs for the various pins and trophies that are set up for competition by the "Dominion Marksmen". We are confident that before many months have passed one or more teams will be ready for competition with other clubs.

We remind you that our Indoor Shoots are being held, starting at 7:00 p.m., every Monday evening and a cordial welcome is extended to young and old, male or female to join the club.

Barber Engineering Displays Mobile Unit

Barber Engineering and Supply Company, distributors for Fisher Governor products will bring the Fisher Governor Mobile display truck to Drayton Valley June 20 and 21, from 10:00 a.m. to 6:00 p.m., each day. The unit will be parked on the Hudson's Bay Parking lot.

The mobile unit will be of prime interest to members of the gas industry, featuring, as it does, gasway and working models of automatic control valves.

The truck came recently from the Fisher Governor factory in Marshalltown, Iowa; it was driven by factory employees to North Dakota, where it was taken over by Barber Engineering, and taken up north through all districts of Saskatchewan and into

Alberta into Alberta. The unit has been to Valleyview, Grand Prairie, Dawson City, B.C., and is now in Fort St. John B.C. After leaving Drayton Valley it will go to Devon, then Edmonton and Calgary.

When the Fisher Governor mobile truck arrives in Drayton Valley on Monday Mr. S. Gervais, sales engineer for Barber Engineering, will be on hand to explain details of the unit.

Possibly one of the most interesting items to oilmen in the truck, will be the B.S. and W. Monitor; a newly developed Fisher Governor product used to detect the presence of water in oil.

COLORING CONTEST WINNER

Liquid Lamb won the Red and White Stores coloring contest for Western Alberta. Her prize—a bike to be presented to her shortly.

Her winning coloring will compete against winners from twelve other districts for a trip to Disney land.

FIBES DURING MAY (cont.) First, The D.V.V.F.D. is planning a program of house to house

inspections to heat room. Be sure to welcome the team that comes to your house. Remember: FIRE PREVENTION IS YOUR JOB TOO.

Another item of fire news is the new flashing and light system by the fire department members. These lights are to let you know that there is an emergency and to ask you to please clear the way for the fire men. Your co-operation as an individual is necessary if you wish to help in the quick and efficient extinguishing of fires. Spectators are asked to keep all roads clear for the fire men and fire apparatus whenever there is a fire.

The fire department is about to undergo a training schedule sponsored by the Provincial Fire Commissioners. Anyone wishing to join the fire brigade is asked to phone 421, or write Box 46 before July 1st as the schedule begins July 1st and a small number of new members is required.

HEARING CONDUCTED IN STEVENS DEATH

A preliminary hearing in the case of the death of Mrs. Shirley Stevens who was killed in Drayton Valley, near the intersection of 50th Street and 50th Avenue, just before 4:00 a.m. on May 15th, 1960, by a pickup truck owned by Shirley Trucking Ltd. and operated by Mr. Kenneth Cocks, who is employed with Shirley, was held in the Council Chamber of the Town Hall in Drayton Valley, before Magistrate Cledemings, on Tuesday, June 21.

Mr. S.A. Friedman was Crown Prosecutor and Mr. Arnold Mole, Q.C., was counsel for the defence. Mr. Cocks was charged with criminal negligence in the death of Mrs. Stevens under section 192 of the Criminal Code of Canada, and also with section 221, subsection 2, of the Criminal Code, which deals with failing to stop at the scene of an accident. At the opening of the hearing Defence lawyer Mole said the defence had elected for trial by judge and jury at a later date.

Prosecution called their first witness soon after court convened. First witness was Corporal George Laidlaw, of the R.C.M.P. Identification Branch who was called to the scene of the accident on May 16 and took photos of the vehicle involved, of the tire, etc. On the following day Corporal Laidlaw took a picture of Mrs. Stevens in the University Hospital Morgue. The photos were introduced as court exhibits. Next to be called to the witness stand was Mr. Clarence Gordon Koch, now living in Devon, who was with Mr. and Mrs. Stevens on the evening preceding and at the time of the fatal accident. Mr. Koch testified at length about events leading up to the time of the accident and immediately after. It was he who placed the call to the police after Mr. and Mrs. Stevens were struck by the vehicle. Mr. Koch stated that when he heard the vehicle coming he shouted to Mr. and Mrs. Stevens to run off the road; Mr. Koch then ran to the west side of the street, but the Stevens, who were a little behind Mr. Koch, turned back to the east side of the street and were struck by the oncoming vehicle. He said that dawn was just breaking at the time and visibility was poor. Following the accident he ran to the police office and notified the police who called the doctors and the ambulance. He then returned to the scene of the accident and the ambulance and doctors arrived a few minutes later.

Next called to the witness stand was Mr. Stevens who also recounted events leading up to the time of the accident. He stated that he could not recall events immediately preceding the accident, or

GOLDEN WEDDING ANNIVERSARY

Staff Photo

Mr. and Mrs. Albert Stordalvoll

Mr. and Mrs. Albert Stordalvoll celebrated their golden wedding anniversary on Saturday with a dinner at Dunnington School. About seventy relatives and friends sat down to a lovely dinner provided by the ladies of the district.

It was fifty years ago on June 19 when Mr. and Mrs. Stordalvoll were married near Trondheim, Norway.

Mr. Freeman Hill was Master of Ceremonies for the occasion and deserves great credit for the smoothness with which the affair was conducted.

Mrs. Ida Wallace played the wedding march as the bride and

BUILDING

Attending growth continued to be the outstanding feature of the Town of Drayton Valley with the first five months of 1960, to the end of May showing the issuance of building permits for a total value of \$455,375.00.

Ponoka, similar in size, and perhaps just a little larger than Drayton Valley reported a total about half that figure, with some \$225,000.

Following is the list of building permits issued in the three weeks since the last report was published. This permit list is up to the end of May.

John Tounier, lot 10, block 40, Garage.

Bochholz Construction, lot 9, block 40, Renovating office.

Henry Gerson, lot 11, block 25, Residence.

I. Szatame and A. Tuckowski, lot 20, block 6, Shed.

(cont. page 12, col. 1)

groom of fifty years came into the hall with their family and took their places at the head table. Four of the couple's children were able to be present. They were daughter, Ole, (Mrs. Holmes), and sons: Leif, Ole and Ove. Others at the head table were: Mrs. Leif Stordalvoll, Mr. Bill Holmes, Mr. and Mrs. Carding and the Stordalvolls' grandchildren, Agnes and Mabel.

Mr. Henry Dunnington asked the blessing. Mr. Hill proposed the toast to Mr. and Mrs. Stordalvoll.

After all present had done full justice to the delicious meal messes of congratulation and good wishes were read from Hon. J. Percy Page and Premier Ernest Manning.

On behalf of the guests Mr. Delby presented the couple with a beautiful floor lamp. In his remarks Mr. Delby reminisced about the early days at Pembina in which the Stordalvolls played an important part, and of Mr. Stordalvoll's willingness to teach and help a less experienced neighbour with his building.

Mr. Dave Glen spoke of Mr. Stordalvoll's ambition and industry which have been an inspiration to his neighbours.

Mr. Edward Hill played the piano for "For They are Jolly Good Fellows".

Mr. and Mrs. Stordalvoll expressed their thanks, both for the gift and good wishes, and the lovely dinner.

The hall was decorated for the occasion with white streamers and
